Lab 03

Roll No: K191048

Name: Amman Soomro

Section: SE – A

TASK 01

```
package Task_01;

import java.awt.event.ActionEvent;
import java.awt.event.ActionListener;
import javax.swing.*;

class FrameClass extends JFrame implements ActionListener{
    JFrame frame;
    JLabel name, age, gender;
    JTextField textfield, textfieldage, textfieldgender;
    JButton button1, button2, button3;
    public FrameClass()
    {
        frame = new JFrame();
        frame.setBounds(700, 300, 500, 500);

        name = new JLabel("Name: ");
        name.setBounds(100,90,100, 40);
        frame.add(name);

        textfield = new JTextField();
        textfield.setBounds(150,100,200,20);
        frame.add(textfield);

        age = new JLabel("Age: ");
        age.setBounds(100,120,100, 40);
        frame.add(age);

        textfieldage = new JTextField();
        textfieldage.setBounds(150,130,200,20);
        frame.add(textfieldage);

        gender = new JLabel("Gender: ");
        gender.setBounds(100,150,100, 40);
        frame.add(gender);

        textfieldgender = new JTextField();
        textfieldgender.setBounds(150,160,200,20);
        frame.add(textfieldgender);

        button1 = new JButton("Btn 1");
        button1.setBounds(100, 400, 80, 30);
```

```

        frame.add(button1);
        button1.addActionListener(this);

        button2 = new JButton("Btn 2");
        button2.setBounds(200, 400, 80, 30);
        frame.add(button2);
        button2.addActionListener(this);

        button3 = new JButton("Btn 3");
        button3.setBounds(300, 400, 80, 30);
        frame.add(button3);
        button3.addActionListener(this);

        frame.setLayout(null);
        frame.setVisible(true);
    }
    @Override
    public void actionPerformed(ActionEvent e)
    {
        if(e.getSource() == button1)
        {
            textfield.setText("K191048 Amman Soomro");
            button1.setVisible(false);
            button2.setVisible(true);
            button3.setVisible(true);
        }
        if(e.getSource() == button2)
        {
            textfielddage.setText("20");
            button1.setVisible(true);
            button2.setVisible(false);
            button3.setVisible(true);
        }
        if(e.getSource() == button3)
        {
            textfielddgender.setText("Male");
            button1.setVisible(true);
            button2.setVisible(true);
            button3.setVisible(false);
        }
    }
}

public class Task01 {

```

```
public static void main(String[] args) {  
  
    FrameClass t = new FrameClass();  
}  
}
```

OUTPUT

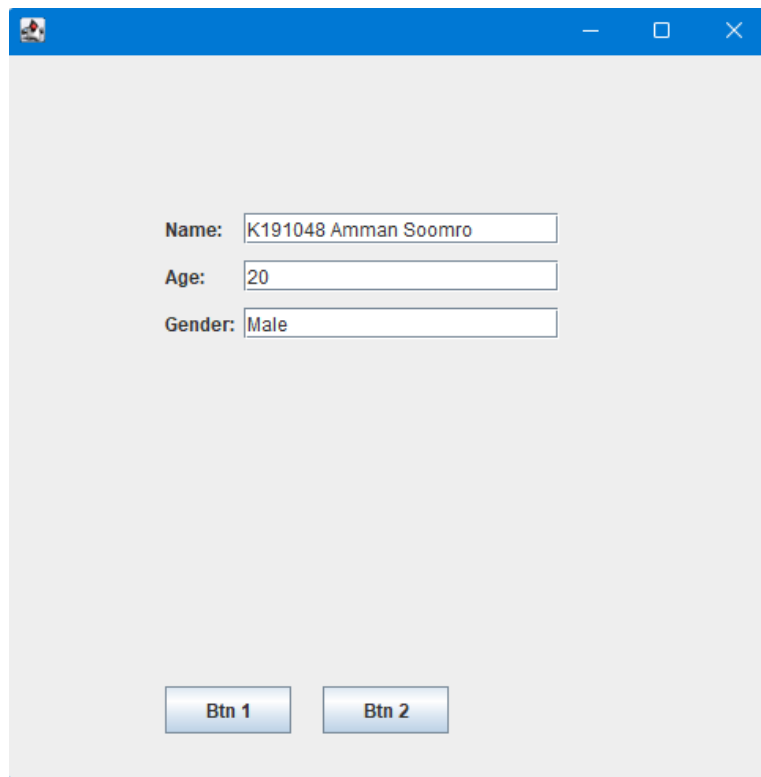

A screenshot of a Windows application window with a blue title bar and standard minimize, maximize, and close buttons. The window contains a form with three input fields and two buttons. The input fields are labeled "Name:", "Age:", and "Gender:". The "Name:" field contains the text "K191048 Amman Soomro". The "Age:" field contains the text "20". The "Gender:" field contains the text "Male". Below the input fields, there are two buttons: "Btn 1" on the left and "Btn 3" on the right.
